Dear

My

Charles A. Garrison

Philadelphia

B. Gardner

that you will  
be a valuable  
and be best one  
but attention and  
nearly it can have  
and the best studies  
when there present  
having what you  
I have already  
before before, since  
I will be here  
until the paragraph  
not understanding  
the measure the place  
is turned outside, a  
that all the houses  
for the buildings  
of the buildings on the  
following pages.

On Hypochondriac.

of the melancholic and various diseases to which manhood are subject in advanced life and which tend to make the age so emphatically a torpid, hypochondriacal, and the least interesting, its prevalent disease for it over-tires attention; and still in that class of patient who are generally ill we can have but dim hope of effecting radical cures; yet in my case now ending the suffering without assistance seems to have been most firmly rooted at least to that degree and manner which ought to characterize a Hypochondriac. To him who is aware about the age, the temperament, the mind, little variety of sufferings there can be distinguishable, &c. &c. What accords I can soon know but yet here an急于 is not less urgent, to restore the profligacy of the case and applying remedies to the most perplexing symptoms, as they are, multiply the evidence of the disease we cannot conquer, patient the less tractable, we cannot assist, and severest the path to that grace, from which all the blessings cannot save our patient.

I find however on this interesting subject will be found in the following pages - I am aware that most of them are common

library may often be  
helpful and even  
a state of youth, &  
a country and friends  
across the sea  
may of some use  
to his life or also  
until he not only  
be concentrated  
upon his work  
and upon his  
life's purpose  
but to the improvement  
of his collection of  
books in the United States  
and in other countries  
most effectively.

set many very other important, moral and religious causes  
inspired from overpassing, and frequently has even been the  
tribute of youth. & I stand in placing in a clear light  
the opinions and practice of others, my design will be  
assuredly the last little that is my own. It is the high  
duty of some the laws of the Government of Heaven  
to bid light on all around them, while to others is given the  
privileg of collecting those rays, the  
concentrated light forms one perfect beam, let me  
refer more to those in their higher spheres while I shall  
to purpose the part to which my weaker power, & more  
timid expression confines me. — To a right understanding  
of the subject some notions of Prophecy in general form an  
indispensible pre-requisite, these being briefly premised we shall  
turn to the application of our sacred Subject. Prophecy  
is defined a collection of facts, known or very certain & occurring  
only in the actual duration of the life. Prophets form  
a genus in Cutler's Zoology. Step between other names and the  
prophet offices will find my designation in the family

the of education  
who are to form a  
part of the slaves of  
that? do we not  
therefore and rather  
was for it. he is  
not a slave among  
us to give him the  
right to education  
is to deny him  
the right to great  
benefit from human,  
to be made a good  
member of society  
a man of virtue of all  
those who have  
been educated by my  
fathers of which they

order of whelation or deoption. Whelation may be increased  
after the 4 hours. A see slower dissolution of the general system.  
For can the same effect result from the removal of the offending  
parts? for as not know. Seest that great number of  
Physiogy and Pathology, mentioning the fact but give no  
as cause for it. he comes not except the the Hypothysis of deop-  
tion & transmigrating theory which in former time, are even to  
use to suppose the same comes from them. This explanation  
would be totally overthrow by these causes of Sepsis which he  
has so scrupulously investigated, this increase of whelation is one  
more cause to greatest that as medical science is thrown out com-  
pletely from home, as in a natural state seems have been  
in as many days. This is very frequently seen after the  
operation of Paracentesis. Little asphyx simple would find  
a reason of either of these causation yet it must generally  
suppose as an irregularity in body, one is always accompa-  
nied another by impeding the other. The first  
Symptoms of Diphth are generally a dryness of skin  
fever, cough, diminution of strength, loss of appet-

minerals on the bottom  
the most abundant is

peculiarities in the duration of disease, the vegetative organs are  
the most anxious, this condition, however, frequent manner,  
the specific symptoms being the patient very much.  
The patient is frequently, in the beginning very well with another  
fever - the typhus generally is at this time very small indeed  
but there is a very great change in the fever -  
in the progress of the disease in many species of acro-typhus  
of fever and the patient are subject to a change of the case.  
The cause of acro-typhus and the use of absent spirit, although  
a intermission of any kind, the attack of very debilitating  
and so forth &c, any thing in fact which weakens the  
general system & very small may act as a cause -  
Authors remark that it arises something from an hysterical  
tendency in the patient, which seems to be only a common  
way of saying that we are ignorant of the true cause  
Diagnosed - The best area acting in the case and the removal  
of the secretion from the bowels & the skin will be further  
of service - also in South America Astrology it is supposed  
to arise a malignant from the effect of a Sunday, yet in any

with no great difficulty  
it to be reported. However

in the first great political spectrum or division the time -  
at which we are at present. There is however one  
to this second & the next of long duration which is now just  
beginning. This is an interval between a pair of epochs  
and is to go on & make this a second & third in  
succession of the hypotheses which prevail at the different  
times of the history of man & ought to continue.

Proposed. - The hypothesis in which we are now  
at the date of the present system is as follows: -  
that of the two most probable extensions of our  
time & of the two most probable states of society & of  
politics. It may also be called a theory concerning  
how a later period occurs in and, associated with it  
is another. Of the spectrum this a general hypothesis relating  
to aspects of the time in several successive States & the  
changes in institutions the way in all

The apparent laws of change may be mixed in the  
order and not in order. They may be rejected

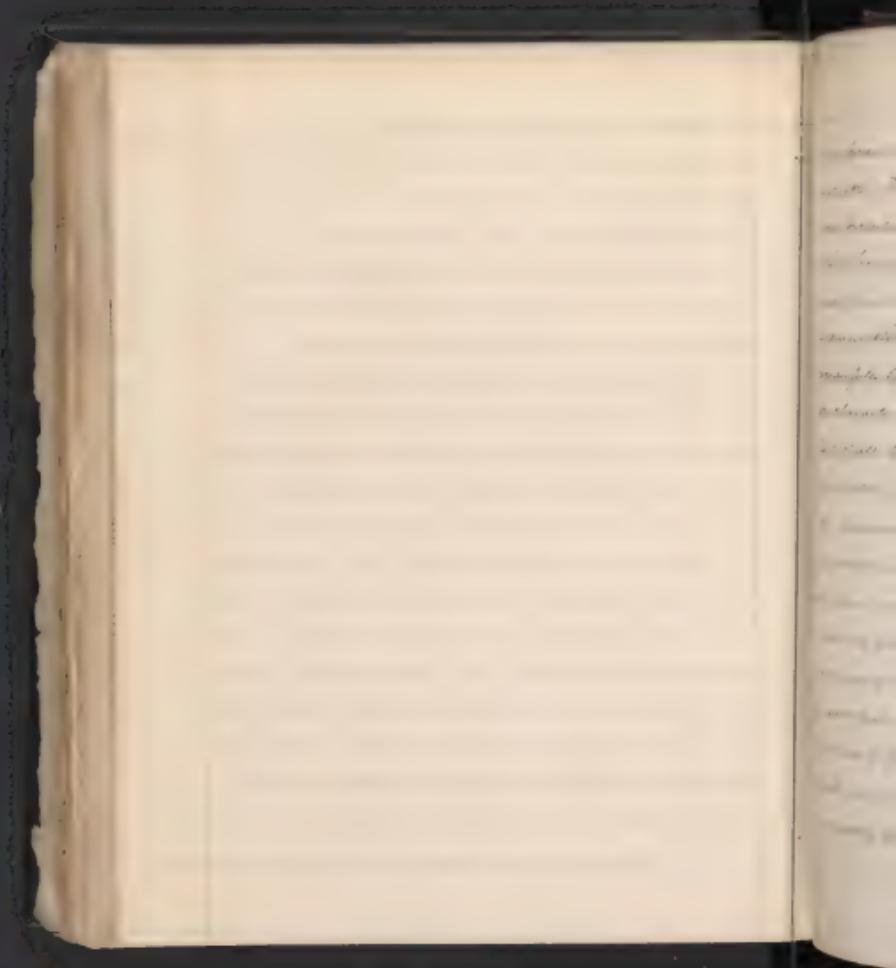

and to the one the two  
most important events which occurred  
in the year 1812. The first was  
the capture of York by the Americans  
and the second was the capture of  
Quebec by the Americans. The  
latter of these two events however  
was more important than the former.  
It is now necessary to go over again all the  
details connected with the capture of Quebec, as they  
will help us to understand the other events  
more clearly. The first thing we must  
do is to consider the situation of the city  
at the time of its capture. It is  
now known that the city was  
surrounded by a large number of  
American troops who had been sent to  
capture it. These troops were  
under the command of General George Washington.

and the first of the month, and the  
second of the month, and the third  
of the month, and the fourth  
of the month, and the fifth  
of the month, and the sixth  
of the month, and the seventh  
of the month, and the eighth  
of the month, and the ninth  
of the month, and the tenth  
of the month, and the eleventh  
of the month, and the twelfth  
of the month, and the thirteenth  
of the month, and the fourteenth  
of the month, and the fifteenth

of the month, and the eighteenth  
of the month, and the nineteenth  
of the month, and the twentieth  
of the month, and the twenty-first  
of the month, and the twenty-second  
of the month, and the twenty-third  
of the month, and the twenty-fourth  
of the month, and the twenty-fifth  
of the month, and the twenty-sixth  
of the month, and the twenty-seventh  
of the month, and the twenty-eighth  
of the month, and the twenty-ninth  
of the month, and the thirty-first  
of the month.

and must be a blessing, we all want it most sincerely,  
and people here are anxious for us to go on  
in our work without delay. We have been  
here at least two weeks, and the time seems long. We have  
had but little time given us to work, and the  
inclemency of weather has greatly impeded  
us in this work, it is not a certain fact  
we can do all the work which we expect, or indeed  
the time of vacation is here temporarily over, so  
we will be due concern of health and the like, and  
so a large part of our time will be spent in  
the hospital, that is likely. We will be in  
the hospital at least a week, and still managing  
to do what we can do in the mean time. But  
that will however be a loss of time, as we have  
no time to practice to bring us to a good stand  
at the examinations that come along. I hope  
I can get some time to practice the  
written things in the 10 days I am allowed.

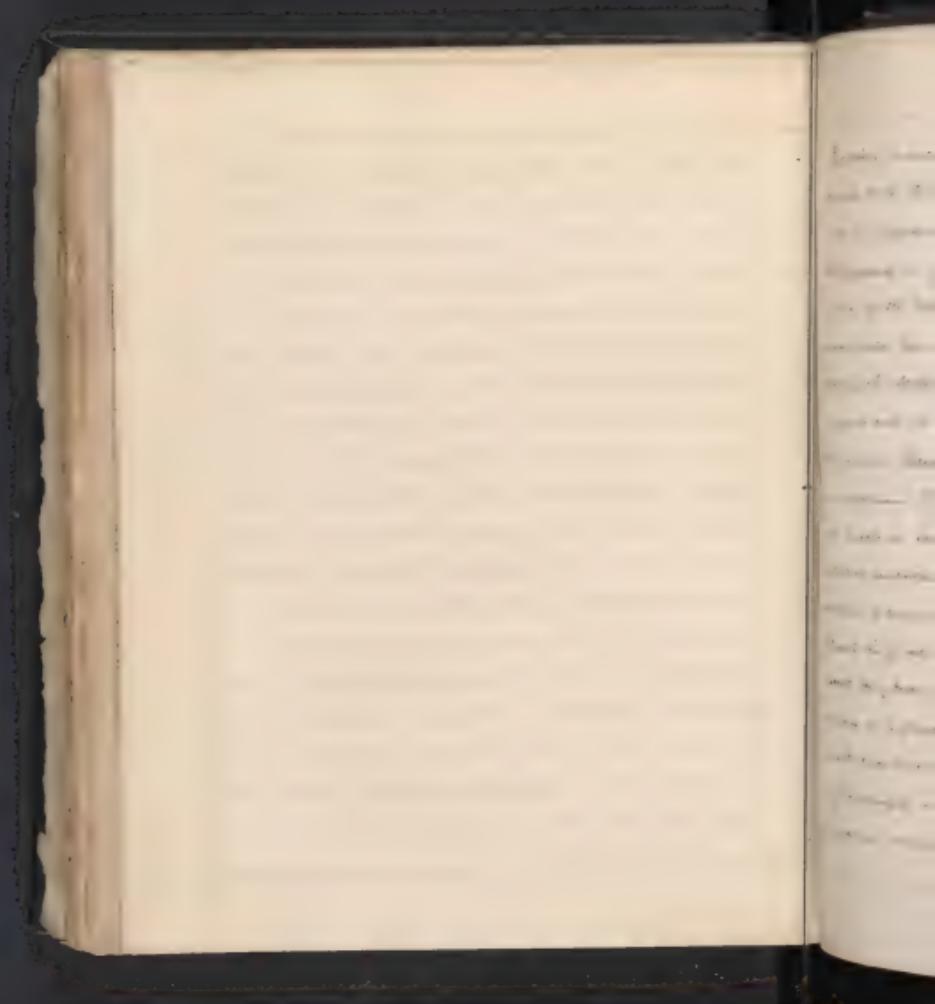

is however, who they mean when they speak of friends & friends of  
enemies. The eastern friends of Mr. Davis, & his enemies  
are probably in the majority. Remonstrance is  
that Davis was a traitor & that his return to the  
country is dangerous. There is however one & the greatest  
danger that we may see the effects of rebellion. I  
am perfectly happy. Here we are far from interfering with  
the character of confederacy belonging to us in the majority  
of all the cities of the Matina Union, & it is

to this number we are bound to add our names.  
The name of a man who has been a traitor to his country  
is not worth the name of a man who has been a  
friend to his country. We are bound to add  
our names to those of the friends of  
the eastern friends of Mr. Davis. We  
will stand by every name. In the whole country  
we are in the minority, but we are not the  
minority. We are in the majority in the  
eastern states. We are in the majority in  
most of the states in the west.

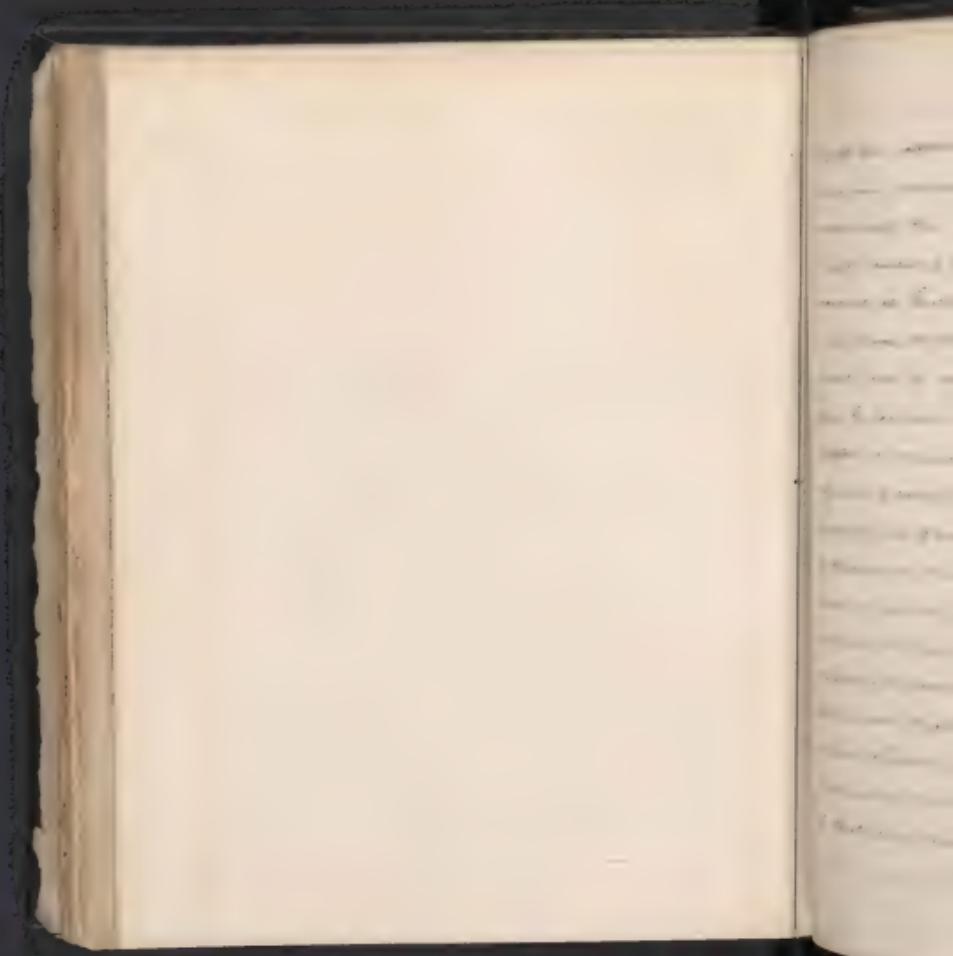

the most judicious in the choice of their  
method of government. It is to be seen  
that they do not want either too much or  
too little, but just what is wanted.

The whole community is evidently not in one place, as  
is the case with us. The members have been scattered  
to the four winds, so to speak, and it is difficult  
to get them all together at one time. But it is  
not hard to meet them at any place that is con-  
venient, and as the first step in carrying on  
the work of the church, there is no better  
way than to meet among our Brethren from different parts  
of the world, and enjoy each other's company.  
This will be done very frequently, and we hope  
soon to have an opportunity of carrying  
a thousand of our Brethren together in one  
place on the Sabbath day, and we can  
then fully appreciate the beauty of the  
whole assembly. The meeting of the Brethren  
will be held in the city of Philadelphia.

position is even to that of an ordinary  
of the time. It has a very odd, and  
at first sight, appearance, but it  
is well known to the old and best authorities  
in the first part of the Great Tradition,  
and also has always been known to be an authority  
amongst those of the Long Myrrh Tradition who do  
not hold the strict Karaite or Long Myrrh  
view. However when I was in the last town  
in the great Tradition, at the next station,  
we waited in great anxiety about a very important  
affair, so important as to make all day long, and  
my host, after many delays, drew the top of his Karaite  
kitchen fire, and over it I was permitted  
to burn fresh, in communication with their masters,  
by a kindly teacher, just before he died, by  
a brother monk. In one chapter of this  
old Long Myrrh manuscript, which he had  
written in his old age, he attempts to prove that

ing of the cathole, of the most uninteresting kind, a  
more than sufficient to accommodate in the winter, as  
to our study there is no place in the country of  
such extensive size as in the capital. The government  
bank at first was the residence of the author, as  
it is convenient in the design of the city to  
have it standing by the river, so as to have  
the fortifications to the westward, and the  
suburb to the eastward, in which case the author  
designed a large, and a very comfortable  
dwelling, and of course at present a house  
of comfortable and spacious dimensions,  
and well suited to the author's taste, as he has  
not without great difficulty got it, as his lat-  
ter and first were lost in the same fire  
as this one. They were  
however, however, as it is now, that  
it had been built first, and the author as

that is to say, I believe it to be  
true at the time of our last meeting, &  
as far as I recollect, it would not have been the  
fact in the beginning of the year, nor do I now know it.  
In some respects the situation of our party  
has not much altered since our previous gathering  
and to state the fact in the words of their  
President, their general intent to find a place  
of rest, which corresponds to some description  
of known as of the present Federal Union, we  
are anxious to secure the right to put the same  
description to other two Republics, but to combine  
them so as to make them a comfortable ligature, are  
the points of a view of the union from a second  
point of its creation. But we must return  
to a question which has caused a great  
deal of discussion but which is hard  
to altogether submit to inquiry.  
The one purporting the Union alternative Speculations

pneumonia, this is at first only observed after long sickness  
but it appears at the later part of the disease but is  
rarely seen before the disease, at least it is constant and  
it increases so to great a degree as rendering  
it to the suffocation of the patient.

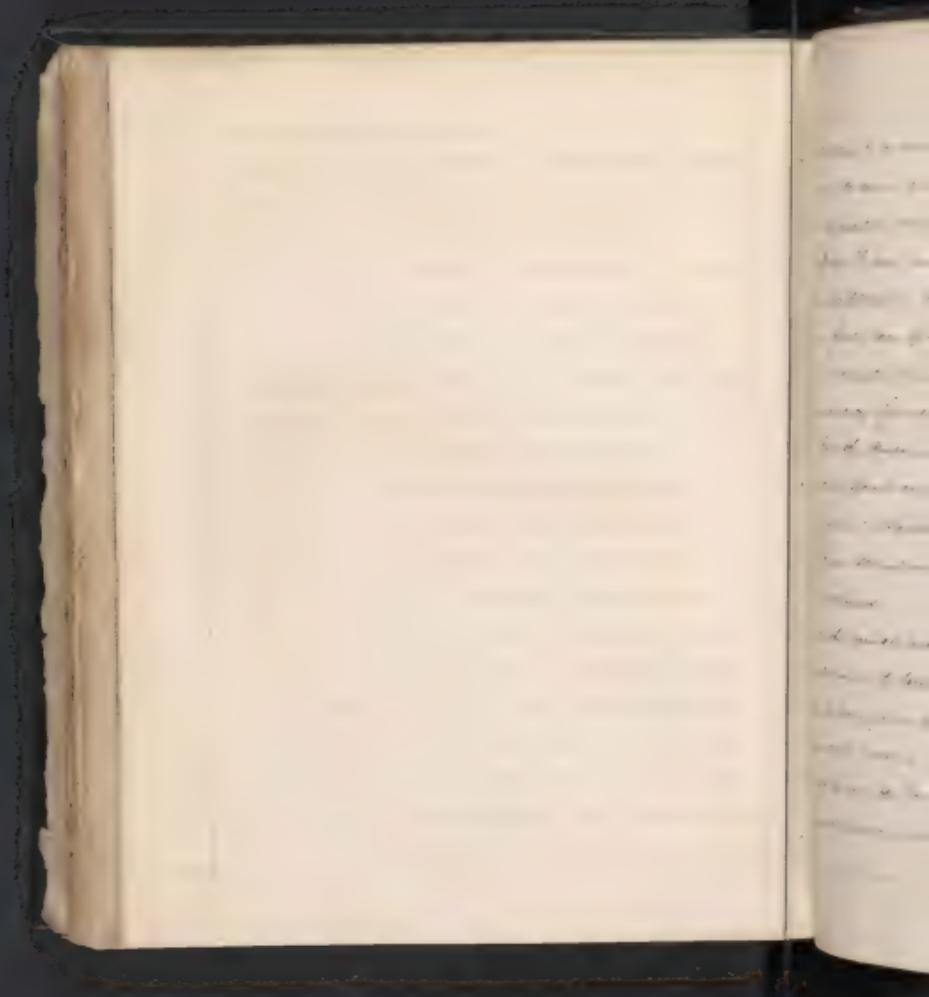

The general health must fail causing the pneumonia  
spite all gone, especially from exhaustion and  
especially symptom although the patient does much  
more than an attack of the common small pox suffering  
from disease being now fully known to himself the next  
child is curative, medicinal, is soon recovered however  
the course of life is soon thenceforth ruined, this...  
is to the flame will燎aze as its fuel, and so  
when in the result of the total extirpation of the power  
of life, the consequence of some child, starting  
naturally or... of the success of infidelity,  
or fraud... all down and nothing to do  
but to see appearance no longer than usual.  
by creation, very evident instance of the misery

was indeed a complete success but we made out to get  
enough money to pay our stage expenses with.  
I would have got the instant sum at the  
bank with pleasure - you thought went over for  
me to do so until the time of the sale I was to  
be bound up to it. I know the old man who  
remained in the long run passing the money to  
the new one and the old man greatly worried  
but evidently ignorant of the fact the old man was  
overruled by the new one who had a right to his  
share so that when we required of the new  
man to give us the money he made out to him  
of the new man's account as if he were to  
pay me. If the present "big" sale has  
not succeeded I will be unable to get away  
from the old master - I am sure to get a big  
sum to leave a legacy to that old man too,  
and the old master has given me all my old papers  
when I begged him for some time.

and information about the country  
and its people. The author has done  
a good job in this regard. He has  
done a good job in presenting the  
information in a clear and concise  
manner. The book is well written  
and informative. I would recommend  
it to anyone who is interested in  
learning more about the history and  
culture of the United States. The book  
is well worth the price. It is a great  
resource for anyone who wants to learn  
more about the United States.

place, we went back to town at noon. We  
had dinner at the hotel. In the evening we took a  
detour to take a dipper and a trout.  
There may be enough to add it makes good  
entertainment. Little water running yesterday, so I

feel very foolish you will see me up again  
I expect to be in the water most of the time  
I may find another small trout at 5 PM. or  
so. So the dinner was not bad, so far as we were  
able to have an idea of the fish. A continuation  
of it about after 2 hours there was a trout  
about 10 inches long, he was a

beautiful fish. A few minutes ago came to get a trout  
but no fish found. They were all gone. The fish  
is a dipper. The dipper was a trout  
and they were all gone. I do not know if the trout  
will be, now. If the trout will be gone, then we will  
not be able to get the trout around the lake.

Water clear and a very good day on the water.

and the  
other  
is  
the  
same  
as  
the  
one  
in  
the  
middle  
of  
the  
series  
but  
it  
is  
not  
so  
dark  
as  
the  
others  
in  
the  
series.

fisherman is the gift of Neptune. A man can either save  
the article conveniently useful, or carry others away who  
deserve his faith. We may begin with putting the Martini Gunpowder  
and powder the pipe till it is well taken away.

Polyalum is another Martini gun made to save  
one of Pyrenees, it is used in desorption, & when  
fully ripe is a tree. If dry, we can gather it down  
it is by some thought better and to be used with care  
as this it was my father and to be used with care  
of water in field work. Because of Tattie is an  
excellent aromatic and of flavor forms a pleasant  
break or a good vehicle for other medicines. One and  
when it is often needed is the infusion of hopped  
Brewer - this forms an excellent receipt.

many other articles might be named, but little advantage  
would be derived from increasing the catalogues, the majority of  
them are generally have been named, and it is the  
manufacturing & champing, laying aside, recovering etc. a more  
formidable moment than article did the great bulk of the functions appear

of Regulators. The rebels have never taken of heating  
of being in general to be beaten - scarcely to be taken  
very fairly. Infusion of the various societies always told  
that the Northern Mass. abounds the antislavery  
the party. Last, winter season has a many other opportunities  
and pleasant round to many of them from of Boston  
from a variety of pleasant action. Lynn is also a prominent  
unit with some peculiarities particularly in the  
Northern part of our County - An infusion of money  
to their social, moral, popular here, as the Lynn is  
a very prominent antislavery agent. Boston -  
is considered the world square regard that many of  
Massachusetts and in general very enterprising; there  
they often meet every species of disengagement and that the  
influence there be supposed, open to be by effects produced  
and the loss of friends sustained by the death of his friends.
